

Home Management Class Grades 9-12

Teacher: Mrs. Lee Clapp

This class is designed to learn how to efficiently run a Christian home. A large portion of the class will have an emphasis on baking and cooking, meal planning, grocery list planning, and over all home organization. We will make a recipe book from the recipes we use through the year.

We will also cover home maintenance topics, cleaning, laundry basics, and house layout. We will also investigate the world of fiber arts and material with knitting, crocheting, and sewing topics. We will touch on gardening (planning a garden, and studying different veggies and fruits). We will have fun shortly researching what is involved in owning a pet. There will be a small time spent on photography principles, and also using photos of food prepared, to add to our recipe books.

Materials needed will be some food ingredients for food preparation homework. Also some material and some yarn will need to be purchased during those units. Text book requirements are still being decided on, but will be limited. There will be more use of reproducibles. Two 3-ring binders will also be needed.

Personal Information: I have been home schooling my own children for 20 years now. I am excited to start teaching this new class at PTC. I am getting all the topics for this class organized and planned and finalized over the summer. I am truly enjoying planning it all and getting ready for the 2017/2018 school year. I look forward to sharing this class with your children. I will love having their input on the topics through the year as well.

Tuition: \$300 per student, and a one time \$15 copying fee.
